

## Human Body Cube

Complete the cube for the human body. Use this pattern or create your own cube. Respond to the questions on each side to analyze your body system in depth.

Describe the importance of your body system.

Tell how your body system compares to another system.

List all of the organs in your body system that impact other systems. Explain their impact.

Discuss what would happen if one of the organs in your body system stopped working.

Name one disease that affects your body system. What are the symptoms?

Do all living organisms need your body system to survive? Why or why not?
